About Me

Pre-final year B.Tech CSE student (2027) with hands-on experience in full-stack web development and AI integration. Built and deployed production-grade applications using React.js, Node.js, and the MERN stack, with practical exposure to RAG-based AI systems and cloud platforms (Microsoft Azure, Oracle OCI). Seeking a software engineering role to contribute strong problem-solving skills, a collaborative mindset, and a consistent record of delivering end-to-end solutions.

Education

Technocrats Institute of Technology – CSE

B.Tech. in Computer Science and Engineering

Sep. 2023 – May 2027

Current CGPA: 8.02/10

St. Paul's Co-Ed School, Bhopal

Senior Secondary, CBSE Board

May 2023

Score: 70.2%

St. Paul's Co-Ed School, Bhopal

High School, CBSE Board

May 2021

Score: 80.2%

Technical Skills

Languages: Java, TypeScript, JavaScript, C/C++ (Basic), SQL, HTML/CSS

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Zustand, Socket.io

Databases & Cloud: MongoDB, ChromaDB, REST APIs, Vercel, Render, Microsoft Azure, Oracle OCI

Developer Tools & AI: Git, GitHub, VS Code, Cursor, Claude Code, Google Gemini API, Sentence Transformers

Projects

PixelSync – Real-time Collaborative Whiteboard | *Next.js, React, TypeScript, Socket.io, MongoDB* | [Live Demo](#)

- Engineered real-time multiplayer collaboration using WebSockets (Socket.io) with sub-100ms latency, stress-tested with 11 concurrent users simultaneously.
- Designed a dual-mode architecture using React Konva for freeform canvas and React Flow for structured node-edge flowcharts, leveraging each library's strengths over rebuilding from scratch.
- Built a secure full-stack system with JWT authentication, RESTful Node.js/Express backend, and MongoDB persistence, deployed on Vercel with a live production URL.

RGPVMate – AI University Assistant | *React, Node.js, Python/Flask, ChromaDB, Sentence Transformers, Gemini API*

- Built a RAG-based AI chatbot for RGPV students, enabling conversational queries over syllabus, previous year papers, exam rules and academic calendar via ChromaDB vector retrieval and Gemini 1.5 Flash.
- Designed a two-service architecture (Node.js + Python/Flask microservice) running Sentence Transformers locally for text-to-vector conversion, eliminating external embedding API dependency entirely.
- Implemented multi-strategy document chunking (per unit for syllabus, per question for PYQs), metadata-filtered retrieval by semester/branch, Google OAuth 2.0, and a live admin panel for document management.

Certifications

Microsoft Azure Fundamentals (AZ-900) | *Microsoft*

April 2026

Oracle Cloud Infrastructure 2025 Certified Foundations Associate | *Oracle*

Oct 2025

Artificial Intelligence Fundamentals | *IBM SkillsBuild*

Jan 2025

Achievements & Co-Curricular

Hack to Crack – Coding Competition

1st Position | *Technocrats Institute of Technology*

- Secured first place among all participants in an intra-college competitive coding event, demonstrating strong algorithmic problem-solving under timed constraints.

ICACIT 2K25

Host & Organizing Committee | *Technocrats Institute of Technology – CSE*

- Served as Host & Organiser for the 2nd International Conference on Advancements of Computational Technologies, managing sessions, speakers, and event logistics.
